SEIF ALDEN AHMED YOUSEIF EISA

Cybersecurity Engineer | SOC Analyst L1

seifa6289@gmail.com | 01211215899 | linkedin.com/in/seif-ahmed-927722330 | Rod El-Farag, Cairo, Egypt

PROFESSIONAL SUMMARY

Fourth-year Cybersecurity student and aspiring SOC Analyst (L1), certified in CEH, Security+, and SOC operations and incident-response (SEC450-GSOC, eCIR). Hands-on experience with SIEM, threat detection, and an AI-powered Intrusion Prevention System built with Python and XGBoost. Strong foundation in networking, Linux, and penetration testing, with practical exposure to Generative AI through a CIB Bank summer internship.

EXPERIENCE

CIB (Commercial International Bank) — Summer Internship Program *July 2026*

- Completed CIB's Summer Internship Program, gaining exposure to the bank's technology environment and professional working practices.
- Completed a dedicated track on Generative AI, covering its core principles, approaches, and industry best practices.
- Received formal acknowledgment for participation, completion, and demonstrated understanding of Generative AI concepts as part of the internship program.

PROJECTS

AI-Powered Intrusion Prevention System (AI IPS) *Present*

Developed an AI-based Intrusion Prevention System for detecting and analyzing malicious network traffic.

- Implemented packet capture techniques for real-time monitoring of network activity.
- Utilized XGBoost machine learning algorithms to classify cyber attacks and suspicious traffic.
- Integrated AI analysis with network security concepts to improve threat detection and response.
- Worked with Python and cybersecurity tools in a Linux-based environment.

IP Network Calculator *Present*

Developed a web application for subnet mask calculation and network conversions.

- Accepts any IP address as input and performs network analysis with clear visual output.
- Helps users understand IP addressing, subnetting, and basic networking concepts efficiently.

EDUCATION

Bachelor of Information Technology (IT) — Specialization: Cybersecurity *2022 – Present*

Helwan International Technological University (HITU)

CORE SKILLS

Cybersecurity: SOC Operations, SIEM, Threat Hunting, Incident Response, Log & Alert Analysis, Vulnerability Assessment, Network Security, Web & Mobile Penetration Testing, Metasploit, Burp Suite, Nmap, Wireshark, Nessus, Ghidra

AI & ML: Machine Learning Fundamentals, XGBoost, Data Preprocessing, Feature Engineering, Model Evaluation (MAE, RMSE), Generative AI

Programming: Python, C++, Java, JavaScript, HTML, CSS

Networking: TCP/IP, Subnetting, Packet Analysis, Log Analysis, Traffic Inspection, Secure Protocols, Virtualization (VMware / VirtualBox)

Tools & OS: Linux & Windows Administration, Android Studio, JADX, Scripting, Technical Documentation

Soft Skills: Critical Thinking, Problem Solving, Leadership, Teamwork, Time Management, Technical Writing, Attention to Detail

Additional Training: Web Application Pentesting, Reverse Engineering, Active Directory, Encryption & Hashing, Social Engineering & Phishing, Network Penetration Testing, System Attacks (RED NEXUS)

CERTIFICATIONS

- CEH (Certified Ethical Hacker) — EC-Council
- Security+ — Netriders Academy
- Network+ — RED NEXUS
- Linux+ — RED NEXUS
- ISO 27001 — EOS (Egyptian Organization for Standardization and Quality)
- eCIR (Incident Response) — Netriders Academy
- SEC450 – GSOC — Netriders Academy
- SEC504 – GCIH — Netriders Academy
- SOC Level 1 Path — TryHackMe
- Digital Forensics Fundamentals — Netriders Academy
